LOCKOUT / TAGOUT

Lockout/Tagout (LOTO) is a process that is used to control hazardous energy. The specific LOTO procedures are designed to protect workers from an unexpected start-up of machinery or equipment, or the release of hazardous energy during service or maintenance activities.

Failure to follow proper LOTO procedures can result in serious, even fatal injuries including electrocution, amputation/crushing, burns, exposure to chemicals, etc. It is therefore important for employees to know and fully understand Lockout and Tagout procedures.
