DRIVER SAFETY

According to Transport Canada, our country has one of the best road safety records in the world. Unfortunately, regardless of our stellar record, each year approximately 2,900 people are killed and more than 220,000 are seriously injured on Canadian roads. In Ontario, the Workplace Safety and Insurance Board (WSIB) has made a commitment towards the prevention of motor vehicle collisions in an effort to reduce the number of injuries and fatalities due to motor vehicle collisions.

'Safe driving' is driving with the intent to prevent collisions by anticipating dangerous situations, regardless of adverse conditions or the mistakes of others. This can be achieved through compliance to a variety of general rules, as well as the practice of specific driving techniques.

Employers should consider a Driver Safety Program for ***any employee who must drive during the course of their employment***. This includes workers who may commute to multiple work locations or attend frequent off-site meetings or business trips, etc.
