

MARQUEE

BENEFITS INC

Looking for the competitive advantage in your trade? Attract and retain key talent to your business?

We offer you, our fellow BCA members, a strategic employee benefit solution that reduces the expenses associated with your offering and fits the needs of your talent.

What is Beneflex?

A Collective Purchasing Plan for Group Benefits. **BENEflex**® has its administrative expenses based on the overall volume of all companies participating in the plan, therefore providing for economies of scale, increasing your purchasing power.

Why Beneflex?

Reduce costs without sacrificing quality or service.

Here's what our combined purchasing power means to you in group benefits:

- Insurer's expenses are lower per employee, which result in lower premiums.
- Improved benefits (less small print) and higher levels of no evidence benefits.
- Greater premium stability (fewer budget surprises), even if you have a period of high claims.
- Undeniable influence and reduced time spent negotiating with insurers if you have a difficult claim.
- Our consultants constantly act for you by monitoring the plan to ensure that it provides value.

In dollar terms, for example, a member company with 250 employees could save \$25,000 – \$50,000 annually under the **BENEflex**™ plan versus a stand-alone program.

Similarly, a **BENEflex**™ member company with 10 employees could save in the range of \$2,000 – \$4,500 per year based on average benefit program costs simply through volume discounts.

Let **MARQUEE BENEFITS INC.** demonstrate what **BENEflex**™ can do for you.
