

Type 1 & 2 Asbestos Operations for Ontario Workers

1 Day Course

**Nov 19 ,
2024**

Pinchin Barrie
Office

Course Overview & Scope

Pinchin's Type 1 & 2 Worker training course is designed for workers who will be required to perform Type 1, Type 2, and/or Glove Bag asbestos work operations. This training teaches the participants about the uses and health hazards of asbestos, and all aspects involved in performing these asbestos abatement operations (work area setup, measures and procedures to be used, personal protective equipment, hygiene practices, and waste packaging and disposal requirements). This course will also cover the training requirements required to perform Type 1 & 2 asbestos operations in accordance with the requirements under Section 19 of Ontario Regulation 278/05.

Please note: the scope of this course does not include the requirements for performing Type 3 asbestos work. Please refer to Section 12 of Ontario Regulation 278/05 for the specific classifications of asbestos work operations or contact us if you require guidance. Also note that theory-based training should be complemented by on-the-job training to ensure a worker is competent to perform asbestos operations.

Course Outline

In this course you will learn about:

- Properties of asbestos and types of asbestos-containing materials (ACM) in buildings
- Health hazards of asbestos exposure
- Ontario Regulation 278/05
- Owner and contractor responsibilities
- Classification of Asbestos Operations (Types 1, 2 and 3)
- Measures and procedures for Types 1 & 2 asbestos glove bag work operations
- Work area setup
- Personal protective equipment and worker hygiene practices
- Work practices and waste packaging
- Work area cleanup
- Transportation and disposal of asbestos waste (brief overview of the requirements)

This course may also include:

- Various demo items, including asbestos material samples and equipment used in Types 1 & 2 asbestos work
- A "hands-on" practical exercise: Type 2 site isolation setup

Proof of Training

Upon completing this course, each participant is provided with a certificate as proof of training. Participants will be required to attend the full training session and pass a written quiz to receive a certificate for this course.
