ONLINE COURSE

Introduction to Construction Estimating

Allows self-paced, online e-learning, accessible 24/7 on desktop, tablet, and mobile devices.

For people working in estimating or for any individual who wants to become an estimator.

Gain the knowledge and skills required to visualize the scope and magnitude of a construction project and produce accurate and reliable estimates.

Course work includes reviewing drawings through various phases of a project with the aim of determining the quantity and type of materials required for the project.

- ✔ Have a good understanding of estimating practices.
- ✔ Know site-specific conditions and regulatory requirements.
- ✔ Know how to handle purchasing and logistics, and how to manage materials on site.
- ✔ Organize cost data in a clear and logical manner.
- ✔ Be able to manage historical information related to costs and know how and when to update this information.
- ✔ Know how to assemble bids and meet bid closure deadlines.
- ✔ Provide on-site solutions to work-related problems in relation to equipment and material placement.

This course uses interactive elements, scenarios, videos, and quizzes to reinforce learning.
